

ABSENCE AND SICK POLICY
Summer Enrichment 2027

- Report all absences (sickness or vacation) to summerschool@brophyprep.org

- **If a student is sick, that student should stay home**, and a parent/guardian must notify the school of the absence. The sick student should not return to school as long as he/she is capable of infecting others. No student whose illness results in a fever (100.4) or other symptoms of a contagious infection should return to school until the fever or other symptoms have subsided for a minimum of 24 hours without fever-reducing medication.

- At present, Brophy does not engage in contact tracing when learning of a positive case and thus does not issue exposure notifications nor subsequent quarantines.

- If a student has been in close contact with an individual who tests positive for COVID, that student does not need to stay home unless or until he/she develops symptoms. If the student does develop symptoms, the student again should stay home.

- The COVID vaccine is not required to attend Summer Enrichment.

- If a student becomes sick during school hours, parents will be notified and may be asked to pick up the student. Sick students should be picked up within one hour of notification.

Thank you for your partnership in keeping our community safe and healthy!
